

## Block of the Month Step 2 - October and November Disappearing Nine Patch Block

This starts with a great beginning basic 9-patch block.

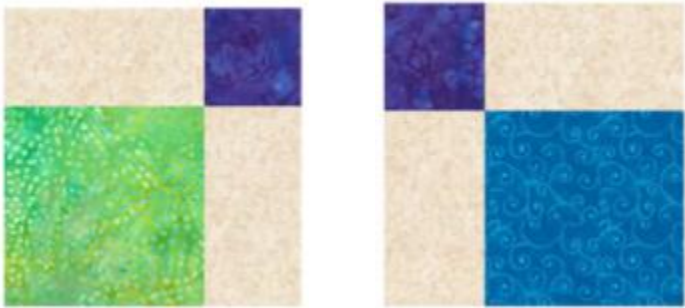

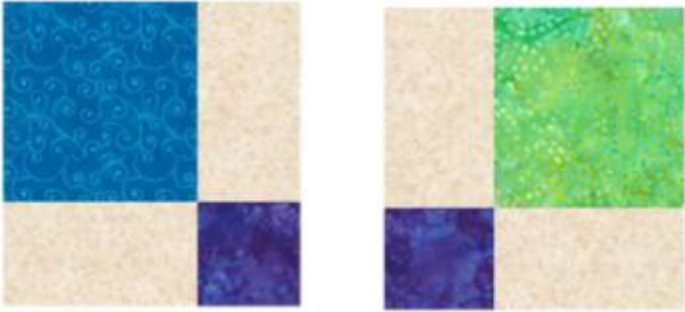

Now let's make it disappear... You will need a ruler as a straight edge, and rotary cutter or scissors.

The first cut should be divided in half from top to bottom. The second cut should be divided from left to right.

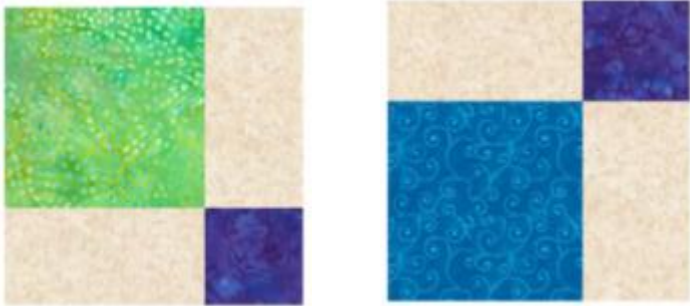

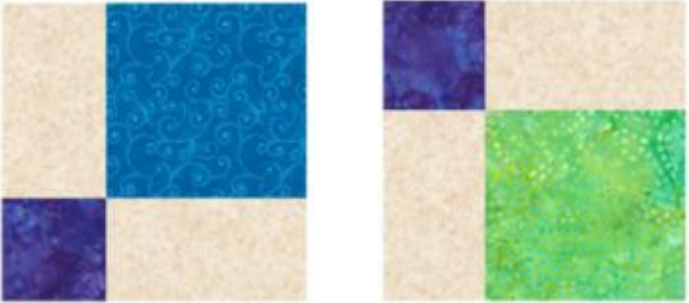

Now, you should have 4 squares.

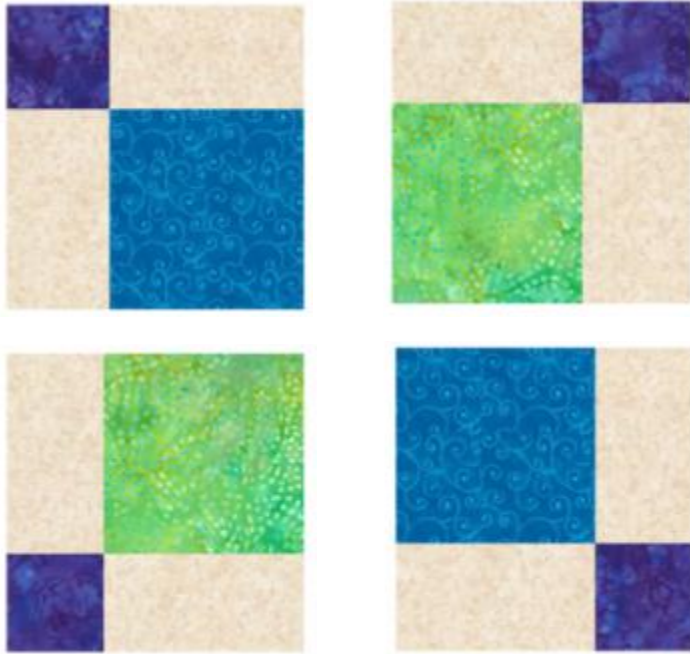

Now let's turn each square to see some beautiful patterns that can be created.

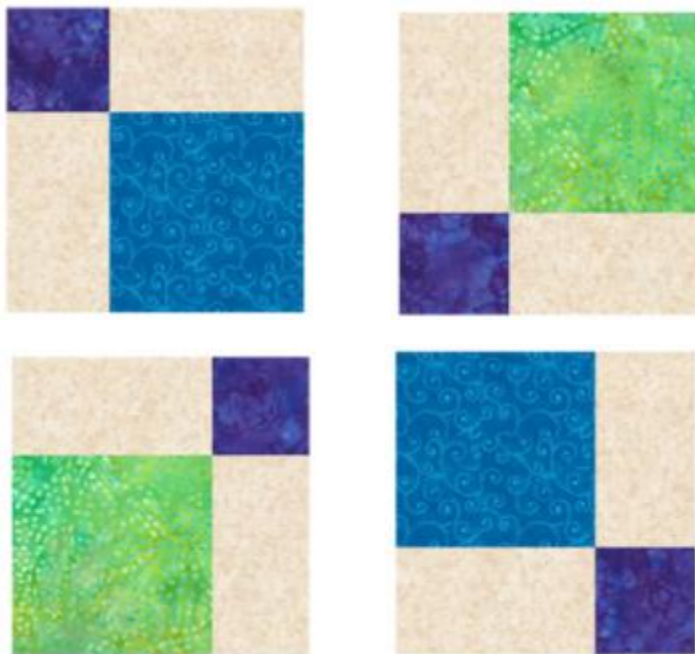

This is just a quarter turn of all 4 corners.

This is a half turn.

Turning opposite corners.

As you can see there is so many choices. So be creative with color and pattern on fabrics. When you have choose your pattern, simply sew  $\frac{1}{4}$  inch seam allowance and your block is one.
